CYCLING CLUB INC

ROCKHAMPTON CYCLING CLUB 2022 CUP ON WHEELS

Welcome Everyone

On Behalf of the Rockhampton Cycling Club, welcome to the 55th running of the Men's Rockhampton Cup and the 54th running of the Capricorn Cup for Women.

Rockhampton Cycling Club wishes to thank the many businesses and families that have returned, as well as welcome the new sponsors that have come on board. All contributions to the club are valuable in ensuring that the carnival continues to meet all expectations of spectators and competitors.

With a total prize purse of over \$10 000, the Rockhampton Cup on Wheels continues to be one of the leading regional track carnivals in Australia.

For the first time ever, our carnival is being live streamed via the Auscycling Qld Facebook page. This will enable people throughout the World to see what a great carnival we have on offer. It is also worldwide exposure for our sponsors through this live stream; thanks to Scott Slade and his team for coordinating this live streaming.

This year Rockhampton will host riders from interstate (including NSW, Victoria and Tasmania) as well as a rider from the USA and returning Capricorn Cup winner, Canadian Lizanne Fox. Considering the current situation of the Covid-19 virus, including the Omicron variant spreading through the community; it is encouraging that these riders still wish to compete at the Rockhampton Cup on Wheels - even though it requires additional testing for them to be allowed into Queensland. The Club extends a massive thank you to all of these riders for your commitment.

This will be the first carnival where both sets of LED lights are running, ensuring that the Rockhampton Cycling Club offers improved track lighting for competitors, via a cost-effective means. Additionally, with the assistance of our local councillor there has been a significant revamp of the grandstand seating. This included replacing the wooden seating material, weld repairs and repainting of the oldest grandstands. The club has also repositioned grandstands, which entailed significant foundation works to ensure that all the grandstands are level and secure.

Thank you to the following

Rockhampton Cup on Wheels Committee for coordinating this event. What has taken several months to "pull together" will no doubt be a great 2 nights of racing.

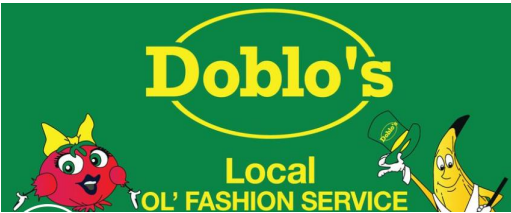

The many volunteers who make such community sport possible.

The Commissaires and all other officials, for without them no racing would be possible.

The riders. Wishing each of you a safe ride, all the enjoyment of racing and the success that comes with competing.

Peter Buchanan
President
Rockhampton Cycling Club

Velodrome Racing

The Bikes

A track bike is a bicycle optimized for racing at a velodrome or outdoor track. Unlike road bicycles, the track bike is a fixed-gear bicycle, thus it has only a single gear and has neither a free wheel nor brakes. Yes, that's right, you can't stop pedalling nor are their brakes to use. Tires are narrow and inflated to high pressure, anywhere from 100psi to 200psi depending on the type of tyre and the track type (concrete, asphalt, or timber) to reduce rolling resistance.

Why do rides take turns on the front?

Formats of track races are also heavily influenced by aerodynamics. If one rider closely follows, they draft or slipstream another, because the leading rider pushes air around themselves, any rider closely following has to push out less air than the lead rider and thus can travel at the same speed while expending less effort. Turn of pace and bunch etiquette vary slightly for Track events. Turns are done by using the banking of the velodrome. Rider's "swing" / "ride" up the bank to allow the next rider in the bunch to take their turn at the front. Track bunches are usually single file for the majority of a race. Towards the end of the Track race the bunch will "fan out" with cyclists riding up to 5 abreast as they race to the finish line.

Event – Handicap

Riders start on different marks around the track depending on their ability. The back markers have to work together to catch the front markers. Sometimes the front markers are able to stay and take the race. Teamwork is required to get into a winning position, then in the last lap it becomes an individual race. **The CQUniversity Rockhampton Cup on Wheels and Joncris Capricornia Cup are handicap races.**

Event – Keirin

The Keirin is a form of motor paced race in which track cyclists sprint for victory following a speed- controlled start behind a

motorcycle. It was developed in Japan around 1948 for gambling purposes and became an official event at the 2000 Olympics in Sydney, Australian.

Lots are drawn to determine starting positions for the riders behind a motorcycle. Riders must remain in their position for the first lap. Riders must remain behind the motorcycle for the predetermined number of laps. Initially the motorcycle makes circuits at about 25 kilometres per hour, gradually increasing to about 30-50 kilometres per hour. The motorcycle usually leaves the track approximately 600-700 meters before the end- you're notice his left indicator come on and he beep the horn to let the rides know. At Elite levels, the winner's finish speed is around 70 kilometres per hour.

Event- Scratch race

The most fundamental race in the velodrome. All riders start at same place (on scratch). The rider that crosses the finish line first on the final lap wins. Scratch races vary in length from 8laps and up and are typically the first event of the evening.

Event- Elimination

A cycling version of musical chairs in which the last rider across the finish line each lap is withdrawn from the race. The tension builds lap after lap as the riders fight for position at the back of the pack. One by one the field is whittled down to the final three riders who then sprint for first, second and third place.

Event – Points race

The Points race is based on a series of sprints usually one every five laps. The riders compete for points in each five laps. The riders compete for point in each of the sprints with the points being 1st-5, 2nd-3, 3rd-2, 4th-1. The race is decided on the person that has covered the most distance, for example if someone laps the field then they will win regardless of the points. If the riders are on the same lap number, then the points come into play. The rider with the most points wins.

The Rockhampton Cycling club wishes to acknowledge and thank the many sponsors that have assisted in making this event a success. Without either the financial support for prizemoney or the generous donations of assistance through various products or services, this event and others like it conducted by Rockhampton Cycling Club would not be possible. Please take the time to browse through the below sponsors and consider them next time you need goods or services; while you're there tell them that you saw their logo on the Rockhampton Cup on Wheels program and thank them for their support.

All of our sponsors have been listed on our Facebook page; feel free to browse our posts if you need additional details
